

Mahmoud Elsebai Eldeeb

Full-Stack Developer | React / Next.js | Node.js / Express / MongoDB

mahmoudalden125@gmail.com | +201116199664 | [linkedin.com/in/mahmoud-aldeeb](https://www.linkedin.com/in/mahmoud-aldeeb) | [Portfolio](#)

Professional Summary:

Full-Stack Developer with 1+ year of professional experience building end-to-end web applications using React.js, Next.js, Node.js, Express, and MongoDB. Skilled in REST API design and integration, role-based authentication (JWT), and state management with Redux Toolkit and Context API. Experienced in performance optimization (lazy loading, code splitting), security hardening, and Agile/Scrum workflows. Holds a B.Sc. in Computer Science with an A+ graduation project in a full-stack e-learning platform.

Technical Skills:

- Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3
- Styling: Tailwind CSS, Bootstrap, CSS Modules
- State Management: Redux Toolkit, Redux, Context API, React Hooks, React Query
- Backend: Node.js, Express.js, Nest.js, RESTful API Design
- Database: MongoDB, Mongoose, TypeORM
- Auth & Security: JWT, bcrypt, Helmet, CORS, Rate Limiting, Input Validation (Joi)
- File/Media & Email: Multer, Cloudinary, Nodemailer
- Tools: Git, GitHub, Postman, Swagger, Jira (Scrum), Figma
- Optimization: Lazy Loading, Code Splitting, SEO, Progressive Web Apps (PWA)

Professional Experience:

- Full-Stack Developer — Space Tech

Jun 2025 – march 2026

- Develop 10+ responsive, accessible UIs using React.js, TypeScript, and Tailwind CSS, reducing UI-related bug reports through consistent component.
- Integrated REST APIs across 10+ features, handling loading/error states, edge cases, and data normalization for predictable UI behavior.
- Managed global application state using Redux Toolkit and Context API, improving data flow predictability and reducing prop-drilling in 5+ component trees.
- Collaborated with backend engineers on API contracts for 8+ endpoints, ensuring seamless end-to-end feature delivery within sprint timelines.
- Applied lazy loading and code splitting techniques, reducing initial bundle size by ~40% and improving Lighthouse performance scores from 65 to 90+.
- Participated in Agile/Scrum ceremonies across 6+ sprints including daily stand-ups, sprint planning, and peer code reviews.

Projects:

Blog App — Full-Stack MERN

- Built a RESTful backend using Node.js (CommonJS) and Express; modeled data using MongoDB and Mongoose.
- Implemented secure authentication using JWT and bcryptjs, with Joi-based request validation including password complexity rules.
- Hardened API security using Helmet, CORS, rate limiting, XSS-clean, and HTTP parameter pollution (hpp) protection.
- Integrated file upload pipeline with Multer and Cloudinary for cloud-based media storage.
- Built email-based workflows using Nodemailer and implemented Google OAuth social sign-in via Google Auth Library.

Medical Appointment Booking Platform — Full-Stack MERN

React, Tailwind CSS, React Router, Node.js, Express, MongoDB

- Designed and built a role-based platform with dedicated dashboards for Admin, Doctor, and Patient user roles.
- Developed appointment booking flow with full history tracking, status management, and cancellation capability for patients.
- Built doctor profiles for availability management and upcoming appointment visibility.
- Architected and integrated an online payment flow with Paymob (integration-ready; pending production activation).

Education:

- Bachelor's in Computer Science, October 6 University | 2019 – 2023
- Graduation Project: Full-stack e-learning platform — Grade: A+

Soft Skills:

- Problem-Solving
- Research Analysis
- Attention to Detail
- Communication Skills
- Leadership Qualities

Language:

- (Arabic - Native)
- (English - Professional Working Proficiency)
